# Is your heating & cooling system efficient?

You may be paying 2 to 3 times as much for your utility bill than necessary and depleting precious energy reserves.

The chart below demonstrates the savings of various systems.

| Type of Heating System                    |                       |                          |
|---|-----------------------|--------------------------|
| Price of Fuel                             | Cost per Million Btus | Annual Home Heating Cost |
| <b>80% efficient propane gas furnace</b>  |                       |                          |
| \$1.80/gallon                             | \$25.00               | \$2,000                  |
| <b>70% efficient fuel oil furnace</b>     |                       |                          |
| \$2.00/gallon                             | \$20.41               | \$1,633                  |
| <b>80% efficient natural gas furnace</b>  |                       |                          |
| \$1.10/100 cu.ft                          | \$13.75               | \$1,100                  |
| <b>95% efficient natural gas furnace</b>  |                       |                          |
| \$1.10/100 cu.ft                          | \$11.58               | \$926                    |
| <b>Electric furnace with no heat pump</b> |                       |                          |
| \$.055/kWh                                | \$16.11               | \$1,289                  |
| <b>15-20 year old heat pump</b>           |                       |                          |
| \$.055/kWh                                | \$10.07               | \$806                    |
| <b>Smart \$aver 14.0 SEER heat pump</b>   |                       |                          |
| \$.055/kWh                                | \$6.71                | \$537                    |
| <b>Smart \$aver geothermal heat pump</b>  |                       |                          |
| \$.055/kWh                                | \$5.04                | \$403                    |

Call our **Green Team** at **1-800-326-2619** to schedule a comparative analysis of your Heating and Cooling system. You'll be very surprised by the money you can save.

## Maintain your comfort level

Did you know that most heating and cooling problems are due to poor maintenance—resulting in high-cost emergency service calls?

Your home may be losing valuable energy everyday due to an improperly maintained system. Our **Green Rewards** Program provides you with:

- 2 precision tune-ups per year
- 24-hour emergency response (live operators on call 24/7)
- No overtime charges for emergency service
- 10% discount on parts and labor for repair to listed equipment
- Priority scheduling for service

## Heat pump rebates

Utility companies are offering \$200 rebates for Heat Pumps and Geothermal Heat Pumps.
